Systems Can Save You Money
Now and in the Long Run

Turn to the Experts for Money-Saving Comfort

There are a lot of reasons why homeowners nationwide turn to the experts at Carrier for their indoor comfort needs. Comfort. Innovation. Reliability. Carrier® Dealer/Experts. We have developed a worldwide reputation for delivering superior indoor comfort technology that truly stands out from the competition, including our remarkable Infinity® system. In addition, we offer a wide variety of products that not only meet the minimum efficiency requirements of the American Taxpayer Relief Act of 2012, but can also provide years of savings on monthly energy bills.

Minimum Efficiency Required for Tax Credit*

Gas Furnaces.....	95% AFUE	\$150
Air Conditioners.....	16.0 SEER / 13.0 EER	\$300
Heat Pumps.....	15.0 SEER / 12.5 EER / 8.5 HSPF.....	\$300
Oil Furnaces and Boilers.....	95% AFUE	\$150
Packaged Air Conditioners.....	14.0 SEER / 12.0 EER.....	\$300
Packaged Heat Pumps.....	14.0 SEER / 12.0 EER / 8.0 HSPF.....	\$300
Ductless Heat Pumps.....	15.0 SEER / 12.5 EER / 8.5 HSPF.....	\$300
Advanced Main Air Circulating Fan.....		\$50
Geothermal	(See below)	

* Cumulative limit of \$500 for all §25C tax credits claimed from 2006-2013

Offering some of the highest efficiency systems in the world, including up to 21.0 SEER cooling efficiency air conditioner systems and up to 98.5% AFUE gas furnaces, Carrier can deliver savings beyond the minimum efficiency standards required for the American Taxpayer Relief Act of 2012.

The Economic Advantage of Tax Credits

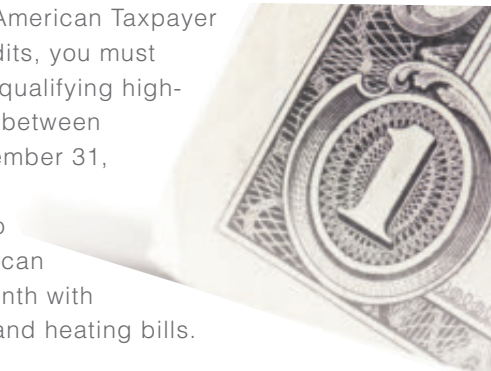

The reason many homeowners are so excited that the tax credits have been retroactively extended is because tax credits, unlike deductions, are subtracted directly from your personal income tax liability. For example, if you complete your tax return and calculate that your tax liability is

\$2,000, a tax credit of \$500 will reduce your tax

liability to only \$1,500. Of course, be sure to check with your tax adviser to determine eligibility for and how to best take advantage of the tax credits.

Tax Credits Available in 2012 and 2013

To take advantage of the American Taxpayer Relief Act of 2012 tax credits, you must purchase and install your qualifying high-efficiency comfort system between January 1, 2012 and December 31, 2013. Better yet, your savings won't be limited to a one-time tax credit. You can continue to save every month with reduced monthly cooling and heating bills.

10-Year Parts Limited Warranty

It's great to know that purchasing a qualifying high-efficiency Carrier comfort system can mean up to \$500 in the form of a tax credit. And, it's also encouraging to know that a high-efficiency system can continue to provide savings on your heating and

cooling bills compared to older, less efficient systems. In addition, it's comforting to know that when you buy your system from Carrier, you'll benefit from one of the best standard limited warranty programs in the industry. In fact, the products that qualify for the American Taxpayer Relief Act of 2012 tax credit program are also eligible for the Carrier 10-year parts limited warranty.†

†The limited warranty period is five years for parts if not properly registered within 90 days of installation. Does not apply to ductless heat pumps, on which standard limited warranty is five years on parts and seven years on compressor. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. See warranty certificate at carrier.com for complete details and restrictions.

Geothermal Tax Credits

For homeowners interested in geothermal systems, the American Recovery and Reinvestment Act of 2009 established a tax credit of 30% of the system cost (including installation) with no cap, through December 31, 2016. All Carrier residential geothermal units qualify, achieving ENERGY STAR® efficiency standards.
